(/interviews/show/8395/in-jquery-the-method-used-to-hold-or-release-the-execution-of-ready-ev)

NOTE: This is objective type question, Please click question title for correct answer.

In JQuery, the method used to bind a function with another function is ?

(/interviews/show/8396/in-jquery-the-method-used-to-bind-a-function-with-another-function-is)

NOTE: This is objective type question, Please click question title for correct answer.

In JQuery, the method used to attach a handler to an event of an element is ?

(/interviews/show/8397/in-jquery-the-method-used-to-attach-a-handler-to-an-event-of-an-elemen)

NOTE: This is objective type question, Please click question title for correct answer.

In JQuery, the method used to create a copy of the set of matched elements is ?
(/interviews/show/8398/in-jquery-the-method-used-to-create-a-copy-of-the-set-of-matched-eleme)

NOTE: This is objective type question, Please click question title for correct answer.

What is the basic syntax of jQuery?
(/interviews/show/8576/what-is-the-basic-syntax-of-jquery)

Syntax of jQuery:

```
$(selector).action()
```

Where **\$** sign indicates to define or access jQuery,
(selector) indicates to "query (or find)" our HTML elements and,
jQuery action() indicates to be performed on any controls.

How to hide current element or controls in jQuery?
(/interviews/show/8577/how-to-hide-current-element-or-controls-in-jquery)

We have to pass **this keyword** in **selector** as it indicates current object in Dot Net and hide is an in-build method which is used to Hide any controls from Page.

For Example:-

```
$(this).hide();
```
