How to Add multiple classes to any controls dynamically?

([/interviews/show/9634/how-to-add-multiple-classes-to-any-controls-dynamically](#))

More than one class may be added at a time, separated by a space, to the set of matched elements like below code:-

```
<script src="//code.jquery.com/jquery-1.10.2.js"></script>

$("p").addClass("class1 class2");
```

Here class1 and class2 are 2 separate classes.

How to Remove class to any controls dynamically?

([/interviews/show/9635/how-to-remove-class-to-any-controls-dynamically](#))

removeClass is an in-built jQuery method, which is used for removing any class dynamically. We have to pass class name in this **removeClass method**.

Syntax:-

```
removeClass(className);
```

For Example:-

```
<script src="//code.jquery.com/jquery-1.10.2.js"></script>

$("p").removeClass("className");
```

How to Remove class to any controls dynamically?

([/interviews/show/9636/how-to-remove-class-to-any-controls-dynamically](#))

removeClass is an in-built jQuery method, which is used for removing any class dynamically. We have to pass class name in this **removeClass method**.

Syntax:-

```
removeClass(className);
```

For Example:-

```
<script src="//code.jquery.com/jquery-1.10.2.js"></script>

$("p").removeClass("className");
```

How to check/uncheck a Checkbox control or radio button using jQuery?

(/interviews/show/9637/how-to-checkuncheck-a-checkbox-control-or-radio-button-using-jquery)

Using the Prop method,we can achieve:-

To Check #rdb_active buttons

```
$("#rdb_active").prop("checked",true);
```

To Uncheck #rdb_active buttons

```
$("#rdb_active").prop("checked",false);
```

Similarly,we can use Checkboxes.

How to disable/enable a radio buttons or check boxes?

(/interviews/show/9638/how-to-disableenable-a-radio-buttons-or-check-boxes)

We can enable or disable a radio buttons or check boxes using the .prop() method.We have to write disabled property in prop method.

For Example:-

//To Disable controls

```
$("#control_id").prop("disabled",true);
```

//To Enable controls

```
$("#control_id").prop("disabled",false);
```

Where,control_id is your checkbox/radio buttons id.

How to check jQuery version?

(/interviews/show/9713/how-to-check-jquery-version)

jQuery keeps track of the current version of the script being used in **jQuery.fn.jquery** property. **Both major version version 1.x and version 2.x have this property.**

```
jQuery.fn.jquery;
```

It will return **string: "1.10.2"**

What is the shorthand for jQuery to get Version?

(/interviews/show/9714/what-is-the-shorthand-for-jquery-to-get-version)

Since **jQuery == \$**, so we can use shorthand syntax as

```
$.fn.jquery;
```

This will return the same version.

What is the alternate method to get Version?

(/interviews/show/9715/what-is-the-alternate-method-to-get-version)

Write below code:-

```
jQuery().jquery;
```

OR shorthand method

```
$.jquery;
```

How can we check the Loaded jQuery UI Version?

(/interviews/show/9716/how-can-we-check-the-loaded-jquery-ui-version)

Returns jQuery UI version For ex: 1.8.2 or undefined

```
$.ui.version
```

What is the alternative way of checking Loaded jQuery UI Version?

(/interviews/show/9717/what-is-the-alternative-way-of-checking-loaded-jquery-ui-version)

Write below code to check Loaded jQuery UI Version as:-

```
jQuery.ui.version;
```

How to remove bottom/last table row using jQuery?

(/interviews/show/9718/how-to-remove-bottomlast-table-row-using-jquery)

We can write below simple code for bottom row removal as:-

```
$('#tbl tr:last').remove();
```

Where #tbl is Htmltable ID.

How to remove n'th or 5rd row from the table using jQuery?

(/interviews/show/9719/how-to-remove-n39th-or-5rd-row-from-the-table-using-jquery)

Simply write below code:-

```
$('#tbl tr:eq(4)').remove();
```

Where 4 is the table index.

How to get the Number of Controls Count using jQuery.

(/interviews/show/9732/how-to-get-the-number-of-controls-count-using-jquery)

jQuery has Length property through which we can find the number of controls

Suppose, we have following HTML structure as shown below:-

```
<div id = div_1" class = "class1">  
  
    <div id = div_2" class = "class2">container 1</div>  
  
    <div id = div_3" class = "class2">container 2</div>  
  
</div>
```

```
$('.class1').length;
```

Output:- 1

```
$('.class2').length;
```

Output:- 2

How to change CSS background image with jQuery?

(/interviews/show/9734/how-to-change-css-background-image-with-jquery)

Write below code:-

```
$('#div_project').css('background-image', 'url(my_image.jpg)');
```

What is an alternative way of changing CSS background image with jQuery?

(/interviews/show/9735/what-is-an-alternative-way-of-changing-css-background-image-with-jquer)

Just write below code:-

```
$('#div_project').css('background', 'url(path/to/image.jpg)');
```

How to add class to the last selected paragraph element and highlighting it.

(/interviews/show/9736/how-to-add-class-to-the-last-selected-paragraph-element-and-highlighti)

```
<!doctype html>

<html lang ="en">

<head>

<meta charset="utf-8">

<title>addClass demo</title>

<style>

p

{

    margin: 8px;

    font-size: 16px;

}

.selected

{

    color: red;

}

.highlight

{

    background: yellow;

}

</style>

<script src="//code.jquery.com/jquery-1.10.2.js"></script>

</head>

<body>

<p>DotNet</p>

<p>Funda</p>

<p>Website</p>

<script>
```

```
$("#p:last").addClass("selected highlight");

</script>

</body>

</html>
```

How to set target of the first anchor tag link only?

(/interviews/show/9737/how-to-set-target-of-the-first-anchor-tag-link-only)

Using the **prop property of jQuery** , we can do as:-

```
$('a').prop('target','_blank');
```

How to set the target of all anchor tags in the Loop using jQuery?

(/interviews/show/9738/how-to-set-the-target-of-all-anchor-tags-in-the-loop-using-jquery)

Write below code:-

```
$('#a').each(function(){

    $(this).prop('target','_blank');

});
```

What is the key points about IDENTITY_INSERT command?

(/interviews/show/9739/what-is-the-key-points-about-identityinsert-command)

We have following key points about **IDENTITY_INSERT command** :-

- 1). It can only be enabled on one table at a time.If we try to enable it on a second table while it is still enabled on a first table,then Sql Server will generate an error.
- 2). When it is enabled on a table we must specify a value for the identity column.
- 3). The user issuing the statement must own the object,we must have to be a system administrator or having a sysadmin role,be the database owner (dbo) or be a member of the db_ddladmin role in order to run the command.

How to get the number of items to be executed on a pirticular element ?

(/interviews/show/9962/how-to-get-the-number-of-items-to-be-executed-on-a-pirticular-element)
