Ques 31. How do we get JavaScript onto a web page?

Ans. You can use several different methods of placing Javascript in you pages.

You can directly add a script element inside the body of page.

1. For example, to add the "last updated line" to your pages, In your page text, add the following:

```
<p>blah, blah, blah, blah, blah.</p>
<script type="text/javascript">
<!-- Hiding from old browsers
document.write("Last Updated:" +
document.lastModified);
document.close();
// --
</script>
<p>yada, yada, yada.</p>
```

(Note: the first comment, "<--" hides the content of the script from browsers that don't understand javascript. The "//-->" finishes the comment. The "//" tells javascript that this is a comment so javascript doesn't try to interpret the "-->".

If your audience has much older browsers, you should put this comments inside your javascript. If most of your audience has newer browsers, the comments can be omitted. For brevity, in most examples here the comments are not shown.)

The above code will look like this on Javascript enabled browsers,

2. Javascript can be placed inside the element

Functions and global variables typically reside inside the <head> element.

```
<head>
<title>Default Test Page</title>
<script language="JavaScript" type="text/javascript">
var myVar = "\\";

function timer(){setTimeout('restart()',10);}

document.onload=timer();
</script>
</head>
```

Interview Questions and Answers)	Javascript can be referenced from a separate file Javascript may also be placed in a separate file on the server and referenced from an HTML page. (Don't use the shorthand ending <script ... />). These are typically placed in the <head> element. <script type="text/javascript" SRC="/myStuff.js"></script>	J2EE (OnlineTestStart.php?quizId=22&quiz=J2EE Online Practice Test Online Exam)
Java Beans 57 (Technology.php? tech=35&subject=Java Beans Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	.NET
Struts (Technology.php? tech=4&subject=Struts Interview Questions and Answers) 84	Ques 32. How can JavaScript make a Web site easier to use? That is, are there certain JavaScript techniques that make it easier for people to use a Web site? Ans. JavaScript's greatest potential gift to a Web site is that scripts can make the page more immediately interactive, that is, interactive without having to submit every little thing to the server for a server program to re-render the page and send it back to the client. For example, consider a top-level navigation panel that has, say, six primary image map links into subsections of the Web site. With only a little bit of scripting, each map area can be instructed to pop up a more detailed list of links to the contents within a subsection whenever the user rolls the cursor atop a map area. With the help of that popup list of links, the user with a scriptable browser can bypass one intermediate menu page. The user without a scriptable browser (or who has disabled JavaScript) will have to drill down through a more traditional and time-consuming path to the desired content.	VB.Net (OnlineTestStart.php?quizId=72&quiz=VB.Net Online Practice Test Online Exam)
Hibernate 52 (Technology.php? tech=5&subject=Hibernate Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	Microsoft .NET (OnlineTestStart.php?quizId=5&quiz=Microsoft .NET Online Practice Test Online Exam)
EJB (Technology.php? tech=19&subject=EJB Interview Questions and Answers) 80	Ques 33. How to create arrays in JavaScript? Ans. We can declare an array like this var scripts = new Array(); We can add elements to this array like this scripts[0] = "PHP"; scripts[1] = "ASP"; scripts[2] = "JavaScript"; scripts[3] = "HTML";	ASP.Net (OnlineTestStart.php?quizId=70&quiz=ASP.Net Online Practice Test Online Exam)
JDBC (Technology.php? tech=42&subject=JDBC Interview Questions and Answers) 27	Now our array scripts has 4 elements inside it and we can print or access them by using their index number. Note that index number starts from 0. To get the third element of the array we have to use the index number 2. Here is the way to get the third element of an array. document.write(scripts[2]); We also can create an array like this var no_array = new Array(21, 22, 23, 24, 25);	C#.NET (OnlineTestStart.php?quizId=71&quiz=C#.NET Online Practice Test Online Exam)
