12 (Technology.php?tech=24&page=12&subject=Ajax Interview Questions and Answers)

Ques 1. What's AJAX ?

Ans. AJAX (Asynchronous JavaScript (<http://www.withoutbook.com/Technology.php?tech=8&subject=JavaScript%20Interview%20Questions%20and%20Answers>) and XML (<http://www.withoutbook.com/Technology.php?tech=15&subject=XML%20Interview%20Questions%20and%20Answers>)) is a newly coined term for two powerful browser features that have been around for years, but were overlooked by many web developers until recently when applications such as Gmail, Google Suggest, and Google Maps hit the streets.

Asynchronous JavaScript and XML, or Ajax (pronounced "Aye-Jacks"), is a web development technique for creating interactive web applications using a combination of XHTML (or HTML) and CSS (<http://www.withoutbook.com/Technology.php?tech=10&subject=CSS%20Interview%20Questions%20and%20Answers>) for marking up and styling information.

(XML is commonly used, although any format will work, including preformatted HTML (<http://www.withoutbook.com/Technology.php?tech=11&subject=HTML%20Interview%20Questions%20and%20Answers>)).

The Document Object Model(DOM) (<http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=9&subject=HTML%20Interview%20Questions%20and%20Answers>), plain text, JSON (<http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=10&subject=JSON%20Interview%20Questions%20and%20Answers>) and even EBML).

The Document Object Model(DOM) (<http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=15&quesId=1524&subject=XML%20Interview%20Questions%20and%20Answers>) manipulated through JavaScript to dynamically display and interact with the information presented.

The XMLHttpRequest (<http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=24&quesId=895&subject=Ajax%20Interview%20Questions%20and%20Answers>) object to exchange data asynchronously with the web server. In some Ajax frameworks and in some situations, an IFrame object is used instead of the XMLHttpRequest object to exchange data with the web server.

Like DHTML, LAMP, or SPA, Ajax is not a technology in itself, but a term that refers to the use of a group of technologies together. In fact, derivative/composite technologies based substantially upon Ajax, such as AFLAX, are already appearing.

tech=19&subject=EJB Interview Questions and Answers)	Ajax applications are mostly executed on the user's computer; they can perform a number of tasks without their performance being limited by the network. This permits the development of interactive applications, in particular reactive and rich graphic user interfaces.	SCJP (OnlineTestStart.php? quizId=19&quiz=SCJP Online Practice Test Online Exam)
Core Java 306 (Technology.php? tech=1&subject=Core Java Interview Questions and Answers)	Ajax applications target a well-documented platform, implemented by all major browsers on most existing platforms. While it is uncertain that this compatibility will resist the advent of the next generations of browsers (in particular, Firefox), at the moment, Ajax applications are effectively cross-platform.	.NET Microsoft .NET (OnlineTestStart.php? quizId=5&quiz=Microsoft .NET Online Practice Test Online Exam)
JDBC (Technology.php? 27 tech=42&subject=JDBC Interview Questions and Answers)	While the Ajax platform is more restricted than the Java platform, current Ajax applications effectively fill part of the one-time niche of Java applets: extending the browser with portable, lightweight mini-applications.	ASP.Net (OnlineTestStart.php? quizId=70&quiz=ASP.Net Online Practice Test Online Exam)
Java Mail 27 (Technology.php? tech=22&subject=Java Mail Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	C#.NET (OnlineTestStart.php? quizId=71&quiz=C#.NET Online Practice Test Online Exam)
Tomcat (Technology.php? 16 tech=33&subject=Tomcat Interview Questions and Answers)	Ans. Google is making a huge investment in developing the Ajax approach. All of the major products Google has introduced over the last year? Orkut, Gmail, the latest beta version of Google Groups, Google Suggest, and Google Maps are Ajax applications. (For more on the technical nuts and bolts of these Ajax implementations, check out these excellent analyses of Gmail, Google Suggest, and Google Maps.) Others are following suit: many of the features that people love in Flickr depend on Ajax, and Amazon's A9.com search engine applies similar techniques.	VB.Net (OnlineTestStart.php? quizId=72&quiz=VB.Net Online Practice Test Online Exam)
Servlets (Technology.php? 34 tech=3&subject=Servlets Interview Questions and Answers)	These projects demonstrate that Ajax is not only technically sound, but also practical for real-world applications. This isn't another technology that only works in a laboratory. And Ajax applications can be any size, from the very simple, single-function Google Suggest to the very complex and sophisticated Google Maps.	Database ORACLE (OnlineTestStart.php? quizId=20&quiz=ORACLE Online Practice Test Online Exam)
Glassfish (Technology.php? 8 tech=57&subject=Glassfish Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	Microsoft SQL Server (OnlineTestStart.php? quizId=50&quiz=Microsoft SQL Server Online Practice Test Online Exam)
JUnit (Technology.php? 24 tech=51&subject=JUnit Interview Questions and Answers)	Ans. AJAX definitely has the buzz right now, but it might not be the right thing for you. AJAX is limited to the latest browsers, exposes <u>browser compatibility</u> (http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=24&quesId=888&subject=Ajax%20Interview%20Questions%20and%20Answers) issues, and requires new skill-sets for many. There is a good blog entry by Alex Bosworth on AJAX Mistakes which is a good read before you jump full force into AJAX.	Database Administration (OnlineTestStart.php? quizId=51&quiz=Database Administration Online Practice Test Online Exam)
Apache Tapestry 9 (Technology.php? tech=67&subject=Apache Tapestry Interview Questions and Answers)	On the other hand you can achieve highly interactive rich web applications that are responsive and appear really fast. While it is debatable as to whether an AJAX based application is really faster, the user feels a sense of immediacy because they are given active feedback while data is exchanged in the background. If you are an early adopter and can handle the browser compatibility issues, and are willing to learn some more skills, then AJAX is for you. It may be prudent to start off AJAX-ifying a small portion or component of your application first. We all love technology, but just remember the purpose of AJAX is to enhance your user's experience and not hinder it.	Microsoft Access (OnlineTestStart.php? quizId=63&quiz=Microsoft Access Online Practice Test Online Exam)
JPA (Technology.php? 14 tech=47&subject=JPA Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	SQL (OnlineTestStart.php? quizId=15&quiz=SQL Online Practice Test Online Exam)
Web Services 10 (Technology.php? tech=20&subject=Web Services Interview Questions and Answers)	Ques 4. Does AJAX work with Java? Ans. Absolutely. Java is a great fit for AJAX! You can use Java Enterprise Edition servers to generate AJAX client pages and to serve incoming AJAX requests, manage server side state for AJAX clients, and connect <u>AJAX clients</u> (http://www.withoutbook.com/InterviewQuestionAnswer.php?tech=24&quesId=866&subject=Ajax%20Interview%20Questions%20and%20Answers) to your enterprise resources. The <u>JavaServer Faces</u> (http://www.withoutbook.com/Technology.php?tech=37&subject=JSF%20Interview%20Questions%20and%20Answers) component model is a great fit for defining and using AJAX components.	MySQL (OnlineTestStart.php? quizId=31&quiz=MySQL Online Practice Test Online Exam)
Java Applet 29 (Technology.php? tech=38&subject=Java Applet Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	Data Warehousing (OnlineTestStart.php? quizId=52&quiz=Data Warehousing Online Practice Test Online Exam)
GWT (Technology.php? 27 tech=52&subject=GWT Interview Questions and Answers)	Ques 5. Won't my server-side framework provide me with AJAX? Ans. You may be benefiting from AJAX already. Many existing Java based frameworks already have some level of AJAX interactions and new frameworks and component libraries are being developed to provide better AJAX support. I won't list all the Java frameworks that use AJAX here, out of fear of missing someone, but you can find a good list at www.ajaxpatterns.org/Java_Ajax_Frameworks .	DBMS (OnlineTestStart.php? quizId=80&quiz=DBMS Online Practice Test Online Exam)
RMI (Technology.php? 31 tech=36&subject=RMI Interview Questions and Answers)	If you have not chosen a framework yet it is recommended you consider using <u>JavaServer Faces</u> (http://www.withoutbook.com/Technology.php?tech=37&subject=JSF%20Interview%20Questions%20and%20Answers) or a JavaServer Faces based framework. JavaServer Faces components can be created and used to abstract many of the details of generating JavaScript, AJAX interactions, and DHTML processing and thus enable simple AJAX used by <u>JSF</u> (http://www.withoutbook.com/Technology.php?tech=48&subject=JBoss)	Scripting Language JavaScript (OnlineTestStart.php? quizId=14&quiz=JavaScript Online Practice Test Online Exam)
Log4j (Technology.php? 8 tech=64&subject=Log4j Interview Questions and Answers)	Ajax (OnlineTestStart.php? quizId=79&quiz=Ajax Online Practice Test Online Exam)	jQuery (OnlineTestStart.php? quizId=85&quiz=jQuery)
