Ques 46. What browsers support AJAX?

Ans.

Internet Explorer 5.0 and up, Opera 7.6 and up, Netscape 7.1 and up, Firefox 1.0 and up, Safari 1.2 and up, among others.

Is it helpful? Yes No

[Add Comment](#)[View Comments](#)

Ques 47. How do I send an image using AJAX?

Ans.

While it may appear that images are being sent when using AJAX with an application like Google Maps what is really happening is that the URLs of images are being sent as the response of an AJAX request and those URLs are being set using DHTML.

In this example an XML document is returned from an AJAX interaction and the category bar is populated.

```
<categories>
<category>
<cat-id>1</cat-id>
<name>Books</name>
<description>Fun to read</description>
<image-url>books_icon.gif</image-url>
</category>
<category>
<cat-id>2</cat-id>
<name>Electronics</name>
<description>Must have gadgets</description>
<image-url>electronics.gif</image-url>
</category>
</categories>
```

Notice that the image-url element contains the location of the URL for the image representing a category. The callback method of an AJAX interaction will parse the response XML document and call the addCategory function for each

Web Services 10 (Technology.php? tech=20&subject=Web Services Interview Questions and Answers)	Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments	Microsoft Access (OnlineTestStart.php? quizId=63&quiz=Microsoft Access Online Practice Test Online Exam)
Java Applet 29 (Technology.php? tech=38&subject=Java Applet Interview Questions and Answers)	Ques 48. Will HTML_AJAX integrate with other Javascript AJAX libraries such as scriptaculous ? How would this integration look like?	SQL (OnlineTestStart.php? quizId=15&quiz=SQL Online Practice Test Online Exam)
Ans.	HTML_AJAX doesn't have specific plans to integrate with other JavaScript libraries. Part of this is because external dependencies make for a more complicated installation process. It might make sense to offer some optional dependencies on a library like scriptaculous automatically using its visual effects for the loading box or something, but there isn't a lot to gain from making default visuals like that flashier since they are designed to be easily replaceable.	MySQL (OnlineTestStart.php? quizId=31&quiz=MySQL Online Practice Test Online Exam)
GWT (Technology.php? tech=52&subject=GWT Interview Questions and Answers) 27	Most integration would take place in higher level components. Its unclear whether higher level components like that should be part of HTML_AJAX delivered through PEAR or if they should just be supported by HTML_AJAX and made available from http://htmlajax.org or some other site. If your interested in building widgets or components based on HTML_AJAX please let me know.	Data Warehousing (OnlineTestStart.php? quizId=52&quiz=Data Warehousing Online Practice Test Online Exam)
RMI (Technology.php? tech=36&subject=RMI Interview Questions and Answers) 31	HTML_AJAX does however offer the ability to use its library loading mechanism with any JavaScript library. I use scriptaculous in conjunction with HTML_AJAX and I load both libraries through the server.	DBMS (OnlineTestStart.php? quizId=80&quiz=DBMS Online Practice Test Online Exam)
Log4j (Technology.php? tech=64&subject=Log4j Interview Questions and Answers) 8	To do this you just need to register the library with your server and load add its flag to your include line.	Scripting Language
JSF (Technology.php? tech=24		JavaScript (OnlineTestStart.php? quizId=14&quiz=JavaScript Online Practice Test Online Exam)

tech=37&subject=JSF Interview Questions and Answers)	<pre><?php Sthis->server->registerJSLibrary('scriptaculous', array('prototype.js','scriptaculous.js','builder.js','effects.js','dragdrop.js','controls.js','slider.js'), '/path/to/scriptaculous/');?> <script type="text/javascript" src="server.php?client=scriptaculous"></script></pre> <p>Is it helpful? <input checked="" type="radio"/> Yes <input type="radio"/> No Add Comment View Comments</p>	jQuery (OnlineTestStart.php?quizId=85&quiz=jQuery Online Practice Test Online Exam)
JBoss (Technology.php?tech=48&subject=JBoss Interview Questions and Answers)		Computer Basics
.NET		Computer basics (OnlineTestStart.php?quizId=16&quiz=Computer basics Online Practice Test Online Exam)
C# (Technology.php?tech=29&subject=C# Interview Questions and Answers)	<p>Ans. Applets provide a rich experience on the client side and there are many things they can do that an AJAX application cannot do, such as custom data streaming, graphic manipulation, threading, and advanced GUIs. While DHTML with the use of AJAX has been able to push the boundaries on what you can do on the client, there are some things that it just cannot do. The reason AJAX is so popular is that it only requires functionality built into the browser (namely DHTML and AJAX capabilities). The user does not need to download and/or configure plugins. It is easy to incrementally update functionality and know that that functionality will readily available, and there are not any complicated deployment issues. That said, AJAX-based functionality does need to take browser differences into consideration. This is why we recommend using a JavaScript library such as Dojo which abstracts browser differences.</p>	
Microsoft .NET (Technology.php?tech=14&subject=Microsoft .NET Interview Questions and Answers)	<p>So the "bottom line" is: If you are creating advanced UIs where you need more advanced features on the client where you want UI accuracy down to the pixel, to do complex computations on the client, use specialized networking techniques, and where you know that the applet plugin is available for your target audience, applets are the way to go. AJAX/DHTML works well for applications where you know the users are using the latest generation of browsers, where DHTML/AJAX "good enough" for you, and where your developers have JavaScript/DHTML/AJAX skills. Many amazing things can be done with AJAX/DHTML but there are limitations. AJAX and applets can be used together in the same UIs with AJAX providing the basic structure and applets providing more advanced functionality. The Java can communicate to JavaScript using the Live-Connect APIs. The question should not be should framed as do I use AJAX or applets, but rather which technology makes the best sense for what you are doing. AJAX and applets do not have to be mutually exclusive.</p>
